

OttoBock Juvo B4

Powerchair

The OttoBock Juvo B4 is a compact but super robust and durable powerchair for reliable everyday use. A rear-wheel drive powerchair, the B4 offers enhanced safety and comfortable damping characteristics for outdoor use.

It is also compact and manoeuvrable indoors. Permanent drive wheel suspension compensates for uneven surfaces and the electric wheelchair's total width of just 590mm makes it easier to drive through narrow doorways and navigate in confined spaces.

Like all models in the Juvo product line, the B4 features a modular design and offers a high level of flexibility.

Choose your seating

Standard Seating comes in four sizes with an adaptable seat width and depth. It has a folding backrest, tension-adjustable back upholstery, flip-up armrests and three leg support styles.

Vario Adjust Seat (VAS) is highly adjustable to match your measurements, even if they change. The Ergo-Joint back angle adjustment largely eliminates shear forces, while the seat frame offers various mounting options including lateral supports.

Compatible with both seat systems, **Contour Package** offers ergonomic seating cushions developed with therapists. Available in a range of sizes and contours, they offer excellent lateral stability and optimal pelvic positioning.

Attendant Control

OttoBock's **Attendant Control** option is the perfect solution for caregivers or companions who need to take control of a power wheelchair.
