*Ocean Ergo, Ergo XL and 24" Ergo models
**Ocean 24" Ergo XL and VIP models

- > No tools required

Accessories

Seating and backrests

Soft seat

Redesigned to mirror the contours of the new ergonomic seat plate, the softer feel gives users with sensory or skin protection issues added relief. Smaller aperture also available for shorter or thinner users. Easy to fit and clean.

Soft seat insert

Available as a standard version or smaller version. Can be used with the soft seat when the commode function is not required.

Ergonomic soft seat

Manufactured from viscoelastic foam, it offers a much softer feel for those with skin integrity or sensory issues. The foam creates greater depth of immersion promoting increased pelvic stability and positioning.

Variable soft seat

Hygiene cut out can be positioned in all four directions, improving access for carers assisting with personal hygiene.

Universal soft seat

Comfortable, closed seat surface for when commode function is not in use.

Solid backrest

The solid back support offers an alternative to the standard tension adjustable backrest, when firmer support is required to achieve a more upright posture. Easy to clean.

Armrest pads

New design offers improved support and comfort for the user (not for XL armrests).

XL back

Increases the width between the armrests by 80 mm. Can be retrofitted to standard Ocean Ergo models.

Wider XL armrests

Increases the distance between the armrests by 40 mm on each side.

Soft backrest cushion

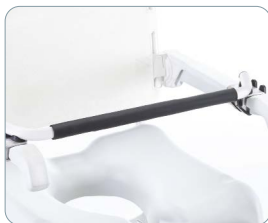

For increased comfort. Can also be used to reduce the overall seat width and depth, helping to position smaller users.

Comfort backrest

An alternative to the standard backrest with a softer feel material for increased comfort.

Safety

Safety bar

For additional safety and reassurance.

Safety lock for armrest

Locks armrest into the vertical or horizontal position.

Front and rear anti-tippers

For additional safety plus front and rear stability.

Tilt-stop

An aid for those who are hoisted in/out of the chair, the tilt-stop screws ensure the frame remains horizontal.

Positioning

Safety belts

Broad pad manufactured from soft material with single pull buckle. Can be used across the pelvis or in addition across the chest for positioning and safety. Easy to attach. Machine washable.

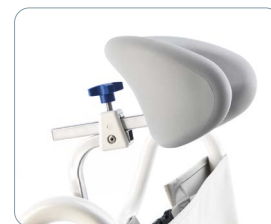

Lateral supports

Adjustable in height via three possible positions on the backrest cane. Broad lateral pads can be repositioned for depth adjustment, comfort and effective pressure redistribution.

Ergonomic headrest holder

Offers multidirectional adjustment to correct or accommodate for more complex head/neck positioning needs. **Pad not included.**

Ergonomic headrest/neckrest

Offers exceptional management of the head position. **Neckrest shown.**

Toileting

Calf and amputee support with foot support

Offers both height and angle adjustment with a contoured pad for added positioning and comfort. Including a foot support for those who may need to elevate their lower limb(s) for medical reasons or comfort.

Calf and amputee support

Excluding footrest.

Splash guard

Clips on easily for use with the standard plastic seat, standard soft seat and small soft seat.

Toilet pan

Ergonomic handle allows the pan to be easily removed and replaced. Features an integrated lid holder, so the lid is not misplaced during use.

Customise each of our Ocean Ergo chairs

Our Ocean Ergo range of shower chairs can all be customised to suit a wide number of needs. By making a simple adjustment or by adding one of our easy-to-fit accessories, each of our modular shower chairs are more versatile than ever before.
