

Support Cushions and Bolsters

Astor Grip Strip Bolsters

A range of bolsters with a 'Grip Strip' system which will hold the bolster in place on any dry surface by simply applying a small pressure over the grip strip. The bolsters can be easily removed and repositioned time and time again by simply peeling the bolster away from the surface it is 'gripped' to.

Vacuum Support Cushions

Internal mouldable bath cushions and supports are a simple and cost-effective way to transform the bathing experience. Made from a waterproof vinyl material filled with small polystyrene beads, these full body or head supports will fit inside any standard or assisted bath. The hand vacuum pump attached is used to remove the air from the cushion creating a firm, flexible and comfortable supportive base, moulded to individually suit the bather.

Base and Side Cushions

If a little extra padding is required within the bath, Astor Bannerman offer a range of base and side cushions. If used in conjunction with spa option, the base cushion can be provided with holes to allow the spa feature to be maximised.
